Venue :
Malaysian Association For The Blind
Jalan Tebing, Off Jln Tun Sambanthan 4, Brickfields, 50470 Kuala Lumpur.

Dato' Dr. Suseela Nair

**FREE
REGISTRATION**

SYNOPSIS

Breast Cancer is the commonest cancer in women all over the world and it comprises 30 % of all cancer in Malaysia. Our statistics show that 1 in 20 women will develop breast cancer in their lifetime. The age adjusted incidence is about the same in all three ethnic groups in the country.

Conventional treatment of Breast Cancer comprises of triple assessment to confirm the diagnosis, ie, clinical examination, Imaging, (mammogram/ultrasound/MRI), and biopsy. Once the diagnosis of cancer is confirmed, the patient is counselled regarding further management, such as surgery, radiotherapy, chemotherapy and hormonal therapy, if indicated. Following this the patient can opt for traditional treatment for general well being, dietary advice, weight loss, etc. I have many patients coming to see me, referred by traditional medicine practitioners who have advised them to have their cancerous lesions removed before they can start treating them. Most patients accept surgery but are fearful of radiotherapy, chemotherapy and hormonal therapy as they feel the modalities will damage the good cells and make them very sick.

CANSURVIVE & IT'S PURPOSE

Cansurvive is a support and information service for those who are challenged with cancer. Not just information and support, but a service that offers a greater awareness of the benefits of holistic, non-invasive cancer therapies, nutrition and diet, as well as orthodox treatments; what is available and where to access them. It is a window of light into the world of healing, where the word "Terminal" is a challenge, not a death sentence.

SPEAKER

Dato' Dr. Suseela Nair obtained her MBBS in 1965 from Nagpur Medical College 1965 under Colombo Plan Scholarship. She chose to specialise in surgery and has served as the Head of Surgery in several hospitals from Muar to Penang. With a special interest in the management of breast diseases, especially, breast cancer, she is currently the consultant breast surgeon in The Breast Unit of the Gleneagles Medical Centre, Kuala Lumpur.

WHO SHOULD ATTEND

People challenged with cancer & their family members, alternative practitioners, medical professionals and anyone who wants to have a greater awareness of health issues.

REGISTRATION
