

CANSURVIVE CENTRE MALAYSIA BERHAD  
A NON-PROFIT CANCER CHARITY ORGANISATION

# HYPERTHERMIA TARGETING CANCER

**Saturday**

**14th December 2013**

**4.00 pm - 6.00 pm**

**Venue :**

**Malaysian Association For The Blind,  
Brickfields.**

**FREE  
REGISTRATION**

## **SYNOPSIS**

We offer two types of hyperthermia, a whole body hyperthermia and loco / regional hyperthermia. The equipment we use comes from Germany and it is truly state of the art equipment, both Celsius 42+ for loco/regional hyperthermia and Heckel3000 for whole body hyperthermia. Each one of them works on different principles.

### **Celsius 42+**

Celsius 42+ works by creating heat locally through the electromagnetic field generated by a low frequency A/C current at a frequency of 13.56MHz. The tumour becomes a capacitor that completes the A/C circuit. It is called a capacitive method. This method allows penetration of about 20cm. So unless the patient is obese with lots of adipose tissue that will distort the electromagnetic field, for a normal body mass index person 20cm is enough, as this would be the distance from the front to the back.

At 42-43 degrees the electromagnetic field kills the cancer cells through necrosis and apoptosis, a programmed cell death, while leaving the healthy cells intact.

## **WHO SHOULD ATTEND**

People challenged with cancer & their family members, alternative practitioners, medical professionals and anyone who wants to have a greater awareness of health issues.

## **SPEAKER**

Voyt Reich is the manager of the clinic and a cancer patient himself. Around February 2012 he was told by his Australian hepatologist that he had three weeks to live and to get his affairs in order. Not willing to throw in the towel, he took the suggestion of his friend, Murray Pearson, himself a pancreatic cancer fighter, now cancer free, and went to Germany to Dr Herzog's clinic in Bad Salzhausen in Germany.

During his six month sojourn in Germany he met people from around the world, many Malaysians and Australians who had to take a gruelling 28 hour flight from major Australian capital cities to Frankfurt to have access to therapies common in Europe but unavailable in Australia.

## **CANSURVIVE & IT'S PURPOSE**

Cansurvive is a support and information service for those who are challenged with cancer. Not just information and support, but a service that offers a greater awareness of the benefits of holistic, non-invasive cancer therapies, nutrition and diet, as well as orthodox treatments; what is available and where to access them. It is a window of light into the world of healing, where the word "Terminal" is a challenge, not a death sentence.

## **REGISTRATION**

Kindly reserve your seats by the following options:

1. SMS your name and email address to  
017 - 881 2287 or Send an email to  
ucansurvive@gmail.com with your name and handphone number.

**Organised by : CANSURVIVE CENTRE MALAYSIA BERHAD (903023-M)**
